A Petition to Cottesloe Council
To prohibit parking on both sides of the curved road
connecting Hamersley and Hawkstone Streets

We request that the Cottesloe Council remedy the dangerous traffic situation on the curve in the road through Grant Marine Reserve connecting Hamersley and Hawkstone Streets.

Cars and trucks are allowed to park along one side of the curve (opposite the yellow line along the ocean/park side of the curve). Especially during summer, there is often a solid line of vehicles parked along the curve.

The road is then only (and barely) wide enough for a single car. A driver coming into the curve cannot see on-coming foot or vehicle traffic: visibility is completely blocked by the parked cars. Meeting an on-coming car mid-curve forces one or the other to back up around the curve to reach and back into a driveway to leave space for the other car to pass. This is an unsafe and nerve-racking manoeuvre.

Further, there are no sidewalks on either side of the road along the curve and people have no option but to walk along the road, with the same inability to see oncoming cars as car drivers.

We ask the Council to prohibit parking on both sides of the curve and request that this matter receives the Council's most urgent attention.

Thank you.

* Dr Glen Koski		
Ms Joanne PARNELL		

* I have had 3 "near misses" in the past year

- (1) car speeding heading north around the curve
- (2) child walking out between parked cars (unseen until in front of me)
- (3) dog (on lead) coming out between parked cars
